# Prescription drugs

Par [Profil supprimé](#) Postée le 31/07/2011 18:45

Hello,

I am wondering whether "clindoxyl gel (clindamycin phosphate and benzoyl peroxide)", an acne cream, and "fucidin cream (fusidic acid)", an antibacterial cream, are permitted in France.

Thanks.

Hello,

Yes, we have this drugs too. The french equivalent for "Fucidin cream" is "Fucidine® crème". We have no strict equivalent to "Clindoxyl Gel" but you can find clindamycin phosphate in "Dalacine T® Topic" and benzoyl peroxide in several drugs (Brevoxyl®, Curaspot®, Cutacnyl®, Eclaran®, Effacné®, Pannogel®, Panoxyl®). All these drugs are anti-acne creams.

If you come to visit France we hope you will enjoy your stay here !

Regards.
